Tim Langlois,

Co-Founder and Chief Operating Officer of Advanced Materials Technology

Mr. Timothy Langlois co-founded and is the Chief Operating Officer (COO) of Advanced Materials Technology (AMT). AMT is a privately held company focused on the research, development and manufacturing of novel materials and devices used for the analysis of pharmaceutical and biochemical products. Using nanotechnology, AMT manufactures commercial products in its laboratory space outside of Wilmington, Delaware. These products are sold worldwide through a network of distributors.

Mr. Langlois is involved in strategic planning of new products and day to day activities including engineering, R&D, marketing and operations.

Mr. Langlois began his career as a product engineer at Rodel (now Dow Chemical). He later held R&D, operations and engineering positions at Hewlett-Packard (now Agilent). Mr. Langlois holds a B.S. in Chemical Engineering from Lehigh University.
